

Woman of the Month: *Bridgit Susim*

Bridgit Susim is an authentic, real, honest, influential, hip leader who influences all around her. She is a storyteller and often times will use what we call a "Briditism" to provide guidance and mentorship. There are a few lessons she will share with those around her like being mindful of patterns and percentages. Or how in each month there is a natural ebb and flow to sales and always trust but verify. She provides so much more and always with a cool and calmness about her.

In her free time, she likes to garden, spend time with her husband Rene of 30+ years, and spend time with her 5 children and 2 grandkids. Plus, her favorite color is orange.

Bridgit's current role as Sr. Regional Portfolio Manager in Ventura allows her to support growing her teams skills and abilities but her 18-year career at Essex has made a lasting impact on the entire company. She is not only a respected mentor who achieves results but also a true friend.
